

- Are you confident that your integrations will work, perform, and scale?
- Can you confidently modify your integration system without breaking code or releases?
- Is everything fully tested?
- Is the integration system able to gracefully handle system failure or scheduled downtime?
- Are transactions lost, duplicated, or delivered exactly once?
- Is every aspect of the integration system monitored for system or transaction failure?
- Does your operations team know what to expect for production operation?

Integration Assessment

An “Integration Assessment” gives you the information you need to make smart decisions about your integration solution.

Implementing a comprehensive integration solution is a large undertaking and a big investment. Understanding what you already have implemented, what your environment needs in the future, and how to plan and budget for your integration solution often seems overwhelming. A Visual Integrator Consulting Integration Assessment can help overcome these integration challenges. An Integration Assessment provides a detailed report on your implementations strengths and weaknesses along with expert, actionable, recommendations on the best plan for getting to the right solution for your organization.

Why do I need an Assessment?

Planning a bulletproof integration environment must start with an assessment of your environment’s current state. An assessment is an essential tool for managing the goals, budget, scope, and timeline for architecting, implementing, fixing, or rolling out your solution.

The recommendations your Assessment provides are based on the following key factors:

- Specific client requirements such as government standards or other industry-specific guidelines
- Visual Integrator Consulting’s own extensive experience in developing and implementing professional integration solutions

Best of all, your Assessment is done on a fixed-bid basis. You’ll have no worries about scope-creep or long-term commitments for a solution you’re not sure of. You’ll know how much your Assessment will cost before work begins, and you are under no further obligation when it’s complete.

What do I get from my Assessment?

Your Assessment will provide:

- Documentation and critical analysis of the current implementation state
- Detailed analysis and actionable recommendations for each selected audit area, including detailed results and executive summaries.
- Recommended action plan, including a high-level project plan you can use as a guide as you formulate next steps
- You get these findings in a detailed, printed Assessment Document, as well as a formal Best Practice presentation,

	Minor corrections or suggestions only.
	Deficiencies found, but deemed correctable within the scope of the project.
	Immediate attention is needed.

You choose what to audit.

We recognize that no two implementations are the same. Likewise, no two assessments are exactly the same. The Visual Integrator Consulting staff has experience auditing a variety of areas related to your integration implementation. You can choose a-la-carte from a menu of available topics to audit, depending on what's important in your case. We can also provide a comprehensive assessment on all integration topics.

- Architecture Standards / Approach
- Design / Development Standards
- Implementation Quality
- Performance, Capacity, Scalability
- Availability, Reliability
- Process and Standards
- Documentation
- Version Control, Configuration Management
- Testing procedures
- Monitoring procedures
- Operations Plan
- Support Desk procedures

How do I get started?

Visual Integrator Consulting is not just a contracting or outsourcing firm. We are senior-level integration experts and solution consultants who bring a proven methodology and recommendations based on extensive field experience in integration industry and products. We consult with you to help you define and refine your goals, and formulate a plan for achieving them.

Call us or visit our web site for more information. We'll give you a fixed-bid for your assessment so you'll know the cost before work begins. You are under no further obligation to Visual Integrator when it's complete.

Let us take the pain, uncertainty, and anxiety out of your integration process. Call us today at: 1-866-568-0589
